

# Press Release - Sauble Beach Water Quality

## Town of South Bruce Peninsula

June 30, 2010

The Town of South Bruce Peninsula has received notification from the Grey Bruce Health Unit that the latest water sampling of Lake Huron at Sauble Beach has produced a bacteria count which is below the Provincially acceptable standard. As such, Town staff are removing the "swim at own risk" signs which were previously posted at the beach.

Sampling of the water is done on a weekly basis, according to the Blue Flag policies to ensure public health and safety.

Mayor Gwen Gilbert thanks everyone for their patience during this time and wishes everyone a safe and happy summer.
