

Some Residents of Sauble Want Sewers

Owen Sound Sun Times

October 22, 2011

Editor:

To Ms. Mason and future letter writers may I suggest that you speak for yourself and only for yourself.

Do not speak for me. The "Sauble residents" voted for the councillor of their choice and unless I missed something it was not a unanimous vote.

There were a substantial number of votes for the three councillors that were in support of sewers. I was one of them. I do not appreciate being lumped in with Ms. Mason's letter that implies that all of "Sauble residents" want things to stay as they are.

I do not want the council to "give it up" or to "leave us alone" as she states. I am hoping that they are looking at all sides of this issue and will act on what they find.

Everyone in this community is allowed to have an opinion and I have one. There are people other than the business owners that want sewers. The environmental impact of "giving up" and "leaving you" alone are frightening to me.

Our community has and will continue to grow. You can't stop that. We need to decide how that growth is best managed. We need to develop infrastructure to grow carefully and safely. We need to get something for our tax dollars. Right now we don't get much. Yes it will cost us money but I am quite sure that the naysayers will gladly jack up the price tag on their home to reflect on new development when they sell that house that they just can't afford.

So please Ms. Mason, have your opinion, speak your mind but remember that it is just your opinion and I have mine and I ask you not to speak for me in the future.
